

## FINISH DATASHEET

Finishing **LIGHT MOTH-EATEN PELTROX®**  
Code **GF00001**  
Family **PELTROX**  
Category **30**

### Materials

- Stainless steel

### Availability

- Sheet

### Description

A soft, light shade of Peltrox®, with a vintage and traditional pewter look. Made on a stainless steel base and enhanced by moths, giving contrast of color with the light part. Depending on the use, you can choose 3 versions: -"Natural", for both indoor and outdoor use - "Glass-lined", a treatment that makes the Peltrox® finish suitable for use in the kitchen environment, being resistant to the most common acid agents. - "Protected", improving the material's scratch resistance, and making it more suitable for home furnishing environments

### Use

- Indoor
- Horizontal surfaces
- Vertical surfaces

### Cleaning and maintenance

Use a cotton or microfibre cloth dampened with water and neutral detergent, rubbing it all over the surface. Remove the remaining detergent with a clean cloth dampened only with water. Then, dry the surface. It is advisable to test any new cleaning agents on areas which are not on view

### Warnings

To preserve the finish, it is advisable to avoid products containing muriatic acid, bleach or chlorine in general, as they can change the colour of the finish; deoxidising creams (like Smac), aggressive solvents such as ammonia or anti-limescale; abrasives (e.g. sponges) or products with micro particles, as they can scratch the surface. Prolonged contact with some substances generates generally light-coloured discolourations. It is advisable to rinse thoroughly in case of spillage on the surface.
