Description

The refined color of pewter on stainless steel, characterized by an elegant light and dark brushstroke, to get a materic-looking finish, suitable for all types of furnishings and different combinations. The glass-line treatment makes Scratched Peltrox® suitable for kitchens, as it becomes resistant to the most common acid agents.

Use

- Indoor
- Outdoor
- Horizontal surfaces
- Marine environment
- Vertical surfaces
- Food use
- Intensive use

Cleaning and maintenance

Use a cotton or microfibre cloth dampened with water and neutral detergent, rubbing it all over the surface. Remove the remaining detergent with a clean cloth dampened only with water. Then, dry the surface. Always follow the direction of the satin finish. It is advisable to test any new cleaning agents on areas which are not on view.

Warnings

To preserve the finish, it is advisable to avoid products containing muriatic acid, bleach or chlorine in general, as they can change the colour of the finish; deoxidising creams (like Smac), aggressive solvents such as ammonia or anti-limescale; abrasives (e.g. sponges) or products with micro particles, as they can scratch the surface. Prolonged contact with some substances generates generally light-coloured discolourations. It is advisable to rinse thoroughly in case of spillage on the surface.
