

Finishing **GLASS-LINED FOSSIL PELTROX®**
Code **GFO0028**
Family **PELTROX**
Category **42**

Materials

- Stainless steel

Availability

- Sheet

Description

The aged and worn stainless steel that bears the marks of intense use. A heterogeneous and shaded color enriched by moths, which enhance its vintage and industrial flavor. The glass-line treatment makes Fossil Peltrox® suitable for kitchens, as it becomes resistant to the most common acid agents.

Use

- Indoor
- Outdoor
- Horizontal surfaces
- Marine environment
- Vertical surfaces
- Food use
- Intensive use

Cleaning and maintenance

Use a cotton or microfibre cloth dampened with water and neutral detergent, rubbing it all over the surface. Remove the remaining detergent with a clean cloth dampened only with water. Then, dry the surface. Always follow the direction of the satin finish. It is advisable to test any new cleaning agents on areas which are not on view.

Warnings

To preserve the finish, it is advisable to avoid products containing muriatic acid, bleach or chlorine in general, as they can change the colour of the finish; deoxidising creams (like Smac), aggressive solvents such as ammonia or anti-limescale; abrasives (e.g. sponges) or products with micro particles, as they can scratch the surface. Prolonged contact with some substances generates generally light-coloured discolourations. It is advisable to rinse thoroughly in case of spillage on the surface.
