

Finishing **SATIN GOLD**
Code **GF00085**
Family **SATIN**
Category **22**

Materials

- Stainless steel
- Steel
- Alluminio

Availability

- Sheet
- Tube

Description

The color of gold, pure and shiny like the precious metal. Exciting and elegant, full of light, this gold version of the Satin processing makes this finish bright and shiny. It can be chosen in its natural or protected version to improve its scratch resistance and to make it suitable for home furnishing environments.

Use

- Indoor
- Horizontal surfaces
- Vertical surfaces

Cleaning and maintenance

Use a cotton or microfibre cloth dampened with water and neutral detergent, rubbing it all over the surface. Remove the remaining detergent with a clean cloth dampened only with water. Then, dry the surface. Always follow the direction of the satin finish. It is advisable to test any new cleaning agents on areas which are not on view. For stubborn dirt we recommend specific professional cleaning agents suitable for painted surfaces.

Warnings

To preserve the finish, it is advisable to avoid solvents such as denatured alcohol or ammonia; abrasive materials (e.g. sponges) or products with micro particles, as they will scratch the surface; products containing chlorates (e.g. bleach); aggressive cleaning agents even if they are specifically for metal (like Smac), as they will damage the surface. Prolonged contact with some substances can generate halos. It is advisable to rinse thoroughly in case of spillage on the surface
