

Finishing X-GLOSSY BIOTITE

Code GF00135

Family X-GLOSS

Category 38

Materials

- Stainless steel

Availability

- Sheet
- Tube

Description

Like the color of the mineral, dark as bronze but with a bright soul, capable of reflecting gold light. The transparent treatment reveals the base material, giving a touch of lightness to the final effect.

Use

- Indoor
- Horizontal surfaces
- Vertical surfaces

Cleaning and maintenance

Use a cotton or microfibre cloth dampened with water and neutral detergent, rubbing it all over the surface. Remove the remaining detergent with a clean cloth dampened only with water. Then, dry the surface. It is advisable to test any new cleaning agents on areas which are not on view. For stubborn dirt we recommend specific professional cleaning agents suitable for painted surfaces.

Warnings

To preserve the finish, it is advisable to avoid solvents such as denatured alcohol or ammonia; abrasive materials (e.g. sponges) or products with micro particles, as they will scratch the surface; products containing chlorates (e.g. bleach); aggressive cleaning agents even if they are specifically for metal (like Smac), as they will damage the surface. Prolonged contact with some substances can generate halos. It is advisable to rinse thoroughly in case of spillage on the surface
