

Finishing **CRUMPLED**
Code **GFO0315**
Family **FABRIC**
Category **30**

Materials

- Stainless steel
- Steel
- Brass
- Copper
- Alluminio

Availability

- Sheet

Description

A light crumple, recalling the texture and lightness of a folded sheet of paper, with its mirror stainless steel base giving great brightness and elegance and evoking light waves of the sea.

Use

- Indoor
- Outdoor
- Horizontal surfaces
- Vertical surfaces
- Intensive use
- Marine environment

Cleaning and maintenance

Use a cotton or microfibre cloth dampened with water and neutral detergent, rubbing it all over the surface. As an alternative, use a mixture of water and 10%-15% alcohol or vinegar. Remove the remaining detergent with a clean cloth dampened only with water. Then, dry the surface. For special cleaning, we recommend Smac Steel: spread it out evenly over the entire surface; wipe with a soft microfibre cloth; rinse and then dry. It is advisable to test any new cleaning agents on areas which are not on view.

Warnings

To preserve the finish, it is advisable to avoid abrasive products (e.g. sponges) or products with micro particles, as they will scratch the surface; solvents; acids; bleach; ammonia; products containing abrasive powders or pastes as they could cloud the finish.
